Digital Hooligan LLC d/b/a Invariant

FEDERAL CAPABILITY STATEMENT

Service-Disabled Veteran-Owned Small Business (SDVOSB) · Veteran-Owned Small Business (VOSB)

CORE COMPETENCIES

Enterprise Software Engineering — custom application development for complex, regulated environments.

AI-Enabled Workflow Automation — bounded automation with human review retained; accountable, not a replacement for oversight.

Identity & Access Management — ICAM: authN/authZ, directory integration, RBAC/ABAC, credential lifecycle.

Enterprise Systems Integration — interface design, middleware, and migration that reduces coupling.

API & Data Integration — API design, data pipelines, and data engineering across system boundaries.

Rapid Prototyping & Applied R&D — fast, low-risk prototypes to de-risk assumptions before full build.

DIFFERENTIATORS

Veteran-founded, operator-led. Engineering led by a Marine Corps veteran with hands-on DoD enterprise technology delivery.

Small-team speed, enterprise discipline. Scoped engagements with documented decisions, review points, and change control.

Accountable AI integration. Human judgment retained throughout; no claim to replace human oversight or accountability.

Built to integrate, not to lock in. Clean interfaces, documentation, and handoff so a prime's team can own and sustain the work.

RELEVANT EXPERIENCE

Invariant is led by a U.S. Marine Corps veteran with professional experience in DoD enterprise technology delivery:

- DoD enterprise technology delivery
- Identity and access management (ICAM)
- C4ISR and systems integration
- Software engineering and applied R&D

Reflects the founder's individual professional background. Not represented as corporate past performance of Digital Hooligan LLC.

FEDERAL TEAMING FOCUS

- Defined engineering work packages within a prime's scope of work
- Specialized technical support: software engineering, ICAM, integration, data, applied AI
- Rapid prototyping and technical feasibility efforts
- Subcontracting on DoD enterprise modernization, AI integration, and software programs

Teaming does not require Invariant to hold its own GSA Schedule or prime contract vehicle.
